

# DON'T LEAVE THE SAFETY OF YOUR STAFF, CLIENTS, AND COMMUNITY TO CHANCE.

## With Vant4gePoint™, the solutions present themselves.

Safety is no accident. Vant4gePoint helps your agency reduce risk more effectively and efficiently. The right decisions come from using all available data, not just a part of it. Vant4gePoint is a digital intelligence platform that brings all your data together and uses automation and AI to classify, predict, recommend, and standardize decisions to improve operations and outcomes including:

- **Improve Safety** – Within your facility and the community you serve, by having a clearer picture of those you serve.
- **Save Time** – Every step is automated so you can spend your time where it's needed most.
- **Save Money** – Improve efficiencies in programming and operations, helping to control costs.
- **Reduce Recidivism** – Connect subjects to the right programs at the right time so they can make a lasting change.

## Embrace Your Data, Empower Your Safety. Know better, so you can do better.

### Criminal Conviction Record Management

Manually add or integrate an offender's criminal history into Vant4gePoint to generate a complete, validated criminal history that can be automated throughout the system.

### Assessments Management

Access our assessment library, featuring the highly predictive STRONG-R and M-PACT assessments. Our platform offers case management tools for precise and comprehensive reports.

### Classification Management

Standardize, enforce policy, measure, and audit classification procedures, decisions, overrides, and approvals for increased institutional security.

### Supervision Level Management

Standardize, enforce policy, measure, and audit supervision procedures, decisions, overrides, and approvals for improved safety and efficiency in community supervision.

### Case Management

Effortlessly manage data for those you serve. Our assessment-driven platform collects validated results from multiple sources to automatically create custom case plans with tailored programming and goals.

### Program Management

Utilize artificial intelligence to match individuals with the most suitable programs. Our proprietary system utilizes assigned attributes to ensure the best fit, including self-paced, digitally-delivered programming.

### Communications

Get updates and collaborate easily with colleagues and clients through a system bulletin. Enjoy features like chat, video calls, and document sharing.

### Document Upload

Easily upload and download client-related documents. A variety of file types can be uploaded and viewed, and documents can be shared with colleagues when necessary.

### Referral Management

Generate and manage programming and provider referrals from a single source on our platform.

### Workflow Management

Streamline workflows and automate processes for increased efficiency.

### Business Intelligence

Gain a comprehensive overview of your data to identify trends and highlight issues or success metrics for key operations and outcomes.

### Evolve/Client Portal

Subjects engage in rehabilitation through our client portal. They access assessments, complete check-ins, communicate with their probation officer, access programs, and manage tasks.

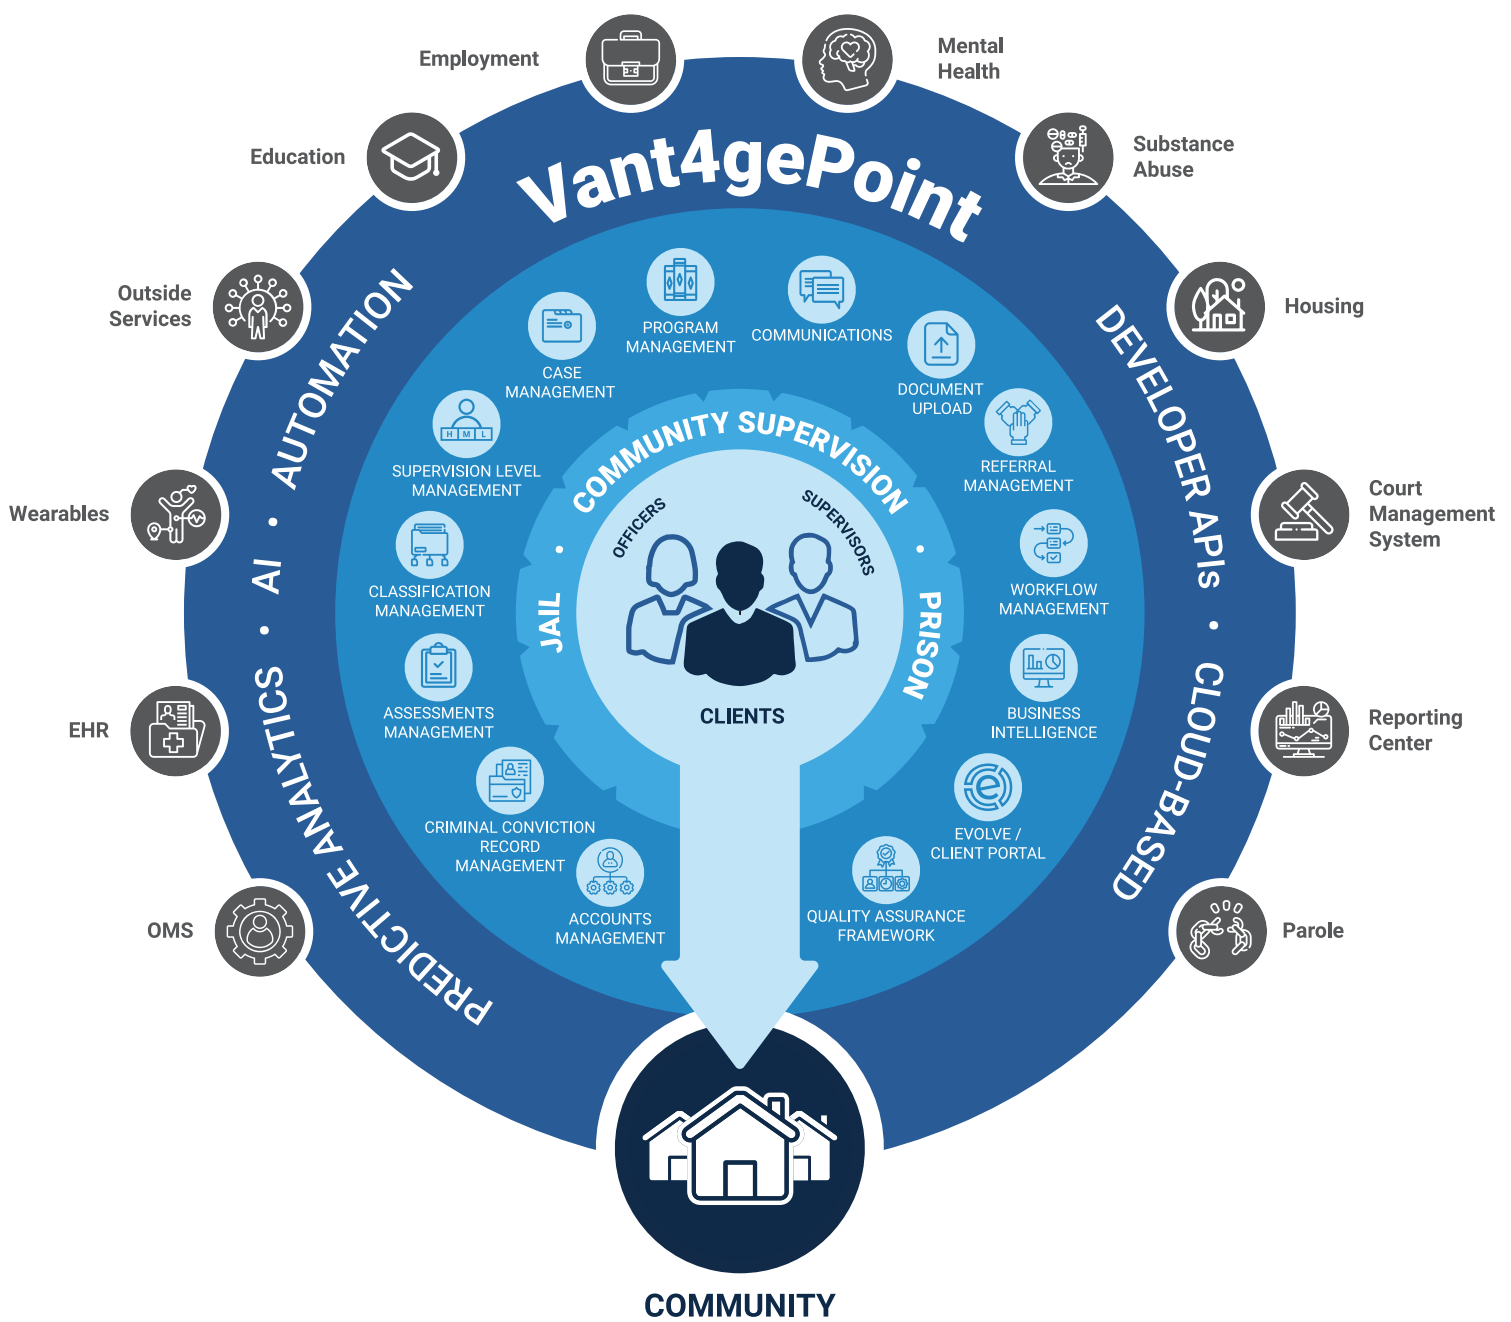

### Quality Assurance Framework

Assess staff training effectiveness by testing assessment consistency. Identify training, user guides, or assessment interview issues, causing discrepancies.

# No matter what system of record you use, Vant4gePoint integrates seamlessly.

This is the foundation for decision support in your jurisdiction, and when integrated it will be a driving force for saving time, money, and lives.

## The Vant4ge™ Difference.

Vant4ge builds software that improves the operations and outcomes of organizations engaged in Human Services. With deep industry experience, we harness data, automation, AI, and evidence-based frameworks, using cutting-edge technology.

More than 100 criminal justice and corrections agencies across the U.S. have utilized Vant4ge's easy-to-implement platforms.
